Sporting Shooters Association of Australia (Brisbane)

Dear Member,

SSAA Qld State Office have provided instruction to ALL SSAA branches. The branches were provided with two options on how to open and operate ranges.

Option 1 – Fully Vaccinated Only:

- No COVID-19 density limits will apply. This would mean no restrictions on vaccinated members, Juniors, Form 33's and authorised visitors.

Option 2 – Vaccinated and Unvaccinated:

- Allows for licensed adult shooters only with density limits and physical distancing of 1.5m

SSAA Brisbane has chosen Option 1 which enables us to open at full capacity to accommodate the greatest number of members, authorised visitors and juniors to attend the range. As at today, the State has 83% of the population fully vaccinated, with 89% at first dose.

Following the instruction received this afternoon from SSAA Qld, we advise that from Friday, 17th December, 2021, all persons attending SSAA Brisbane range facilities must be

- fully vaccinated,
- under 16 years old (vaccination not currently required); or
- have a medical contraindication to the COVID-19 vaccine.

This includes practice and all club competitions, day and night.

In accordance with the current health directives and SSAA Qld requirements, everyone must use the Qld Check In App upon arrival with proof of vaccination or COVID-19 Digital Certificate shown to the staff, range officer or shoot captain.

We understand that the above requirement is to be reviewed at 90%, which is estimated to occur towards the end of January, 2022.

If you have any further queries relating to the vaccination directive for SSAA branches, please contact the SSAA Qld State Office enquiry@ssaaqld.org.au

We apologise for any inconvenience.
